

I do not agree with a corporation like Sinclair Broadcasting requiring local stations to air a show that promotes its owners political bias. If they want to show a particular perspective they need to offer a similarly constructed opposing perspective with equal time and similar timing in the campaign season. They use public airwaves and so are required to serve the public interest. One-sided programing does not serve the diverse public of the United States. Our democracy depends upon diversity and fairness in the media. Please help shore up our democracy by supporting free media.
